

## **Targeting the Tumor in Lymphoma**

**Broadcast Date:** Wednesday, July 8, 2009

**Time:** 6:00 PM PST\*

Sponsored by: Seattle Cancer Care Alliance

### **PROGRAM OVERVIEW:**

Job #1 is always beating the cancer and making sure it doesn't come back. Improved technologies and lengthy clinical trials are zoning in on new ways to target lymphoma tumors. On this episode of Patient Power, **Dr. Ajay Gopal** joins host, Andrew Schorr to discuss targeted radiation therapy, targeting other antigens, low toxicity "proapoptotic" therapy and studies on antibodies for lymphoma.

### **FEATURED GUESTS:**

Ajay Gopal, M.D., Assistant Professor, Medical Oncology Division, Seattle Cancer Care Alliance

### **ABOUT PATIENT POWER:**

*Patient Power is a highly respected online talk show hosted by Andrew Schorr, a 13-year leukemia survivor, patient educator and patient advocate. The program features renowned medical experts on topics that include cancer, pain, diabetes, and heart specialists, as well as experts in clinical trials and top pharmacists. The show serves to bring patients together in a radio and Internet community to provide information about available treatment options. Patient Power welcomes questions from callers and Internet listeners on topics such as how to find the right doctor, how to advocate for yourself effectively, when to get a second opinion from a specialist and how to evaluate one treatment option over another.*
